

## Information over filling the ADN checklist form

To barges calling at Zeeland Refinery, we request to have following documents available:

- a hard copy of the 'Technical Information Tankbarge' (EBIS inspection report) indents A.13.1, A.13.2 and A.13.3 regarding the height, design and diameter of the drop line in the cargo tanks,
- the tank tables of the cargo tanks to be able to check or calculate the quantity of product to fill each tank at the beginning of loading,
- the loading / discharge instructions as mentioned in the ADN Certificate of Approval to be able to check the maximum loading rate half way.

We kindly request you to have the above mentioned documents available upon berthing.

In line with ADN regulation, the terminal has the obligation to check the first foot quantities with the barge captain as well as the maximum allowable loadingrate halfway loading.

**SAFETY FIRST !**
